Subject: RE: Electronic Reports
Attachments: Electronic Reporting 13.pdf

403.12(r) requires that if a POTW with an approved program chooses to receive electronic documents they have to satisfy the requirements of 40 CFR Part 3 (CROMERR rule). I've attached a copy of that reg. Basically Part 3 says that you have to get approval to receive electronic reports and lays out what you have to do to get approval. I think it's subpart D that lays out what you would need to do to get approval. I've also included a link below for a EPA HQ website that talks about electronic reporting and the requirements. From what I understand of the approval process, the formal approval is granted by HQ (with input from the Region) and they like to see a "draft" submission before getting the final formal submission.

<http://www.epa.gov/cromerr/training/cromerr101/>

When you get to this website you'll see a place to click on "next". That will take you through a series of screens that explains the CROMERR rule.

Anyway, let me know if you have any questions.

John:

I was at WESTEC earlier this year and you mentioned that Industrial electronic reports received by the Pretreatment Programs would require approval from EPA. I have searched for information on this and couldn't find anything. Let me know if there is information on this authorization.

Joe
